**PYE Kiosk**

PYE Kiosk is a self-service ordering and payment solution system that helps businesses serve customers faster and take the pressure off staff. Instead of waiting in lines, customers can head to the kiosk, view the menu, customize their order, add upgrades or extras and make payments at the kiosk.

PYE offers a self-checkout experience, with card, contactless and compatible cash and coin payment options. The system also integrates with POS systems, manages menus, provides reporting, prints receipts, and automatically suggests add-ons to help increase the value of each order.
